

### PRODUCT DESCRIPTION

High-end compressed air sprayer specially developed for petroleum-based solvents and aggressive blends. The high-quality sealing materials enable long-term and durable use.

### ADVANTAGES

- » Resistant against pure solvents, acetone, and blends
- » Optimum stand thanks to rubber mounted standing ring
- » Ergonomically shaped grip and spray button with continuous spray function
- » Level indicator strips with integrated scales

### RESISTANT TO THE FOLLOWING CHEMICAL COMPOSITIONS

- » High-percentage solvent blends containing acetates, ketones (such as 20-50% acetone), xylene, toluene, various alcohols, and many other chemical ingredients
- » Acetates such as butyl acetate and ethyl acetate, even in higher concentrations
- » Higher concentrations of glycol ether and cyclohexane
- » Special naphtha-containing (petroleum-based), mineral oil-containing and petroleum-based solvent blends

### SPECIFIC EXAMPLES

- » Brake cleaners with acetone (concentration up to 50%)
- » Anti-corrosives and rust converters
- » Safety and cold cleaners
- » Motor, machine and parts cleaners
- » Quick-acting degreaser
- » Silicone, paint and adhesive removers
- » Nitro and washing thinners
